29	TOOLS FOR NEW AUDITORS	39	24
30	THIRD-PARTY RISK MANAGEMENT FOR INTERNAL AUDITORS	40	16

ADVANCED RISK-BASED AUDITING

Hours	: 16
Knowledge Level	: Intermediate
Prerequisites	: Participants should be senior internal audit practitioners or internal audit managers. Completion of the Fundamentals of Risk-based Auditing course is recommended.
Advance Preparation	: None
Participants Guide Book	: 179 pages
Charges Range in the USA	: \$ 1349 - \$ 1919 per person

Course Contents:

UNIT 1: Risk Management Principles and Concepts; UNIT 2: Assessing Governance; UNIT 3: Risk Related to Strategic Objectives; UNIT 4: Fraud Risk Assessment; UNIT 5: IT Risk; UNIT 6: Assessing the Risk Management Process; UNIT 7: Developing the Risk-based Audit Plan

Course Details:

The need to manage risks is increasingly recognized as essential to effective corporate governance and maintaining an effective system of internal control. Internal audit plays a key role in assuring that risks to the organization are properly managed. Risk-based auditing links the internal audit department's planning activity to an organization's overall risk management framework.

This course provides participants with the knowledge to develop an audit universe and a complimentary risk-based internal audit department audit plan. This course also addresses emerging and advanced risk management topics such as governance risk, strategic risk, fraud risk, and information technology-related risk, and provides insight into auditing the organization's risk management processes. During this course, you will participate in interactive activities and real-life scenarios. Be prepared to walk away with concepts and tools to develop a value-added, risk-based department audit plan for your organization.

AGILE AUDITING

Hours	: 16
Category	: Audit Methodology
Knowledge Level	: Intermediate
Prerequisites	: Participants should have basic Knowledge of the internal audit process
Advance Preparation	: None
Participants Guide Book	: 174 pages
Charges Range in the USA	: \$ 1349 - \$ 1869 per person

Course Contents:

UNIT 1: Defining Agile Auditing; UNIT 2: Understanding Agile Software Development; UNIT 3: Scrum Process Framework; UNIT 4: Agile Auditing Iterations; UNIT 5: Deciding to Go Agile; UNIT 6: Implementing Agile Auditing Using Scrum; UNIT 7: Practice: Mock Agile Audit

Course Details:

Internal audit and internal auditors must be agile — able to add value in a nimble way in response to disruptions and evolving risks faced by the organization. Specific agile software development methodologies and an agile mindset support innovations in the internal audit process to better enhance and protect organizational value. This is agile with a big “A”!

Are you ready to help your internal audit activity become Agile?

This course takes the mystery out of agility. It starts with an overview of the values and principles of Agile software development and introduces scrum – a framework that can be used to manage complexity in the internal audit engagement process. Compatibility with the International Standards for the Professional Practice of Internal Auditing (Standards) is covered to dispel common misperceptions about whether Agile auditing aligns with professional standards. With an emphasis on interaction, this course includes breakout sessions to provide participants with opportunities to actually practice Agile auditing.

ASSESSING ETHICS IN YOUR ORGANIZATION

Hours	: 4
Category	: Ethics
Knowledge Level	: Basic
Prerequisites	: None
Advance Preparation	: None
Participants Guide Book	: 65 pages
Charges Range in the USA	: \$ 369 - \$ 489 per person

Course Contents:

UNIT 1: Applying the IPFF When Assessing Ethics; UNIT 2: Considerations When Assessing Ethics; UNIT 3: Communicating Organizational Ethics

Course Details:

A strong ethical culture is the foundation of good organizational governance. An ethical culture is created through a robust ethics program that sets expectations for acceptable behavior within an organization and by its external partners. It includes effective board oversight, a strong tone-at-the-top, and organization-wide commitment, as well as a customized code of conduct; ethics training, communications, and system monitoring; and an incident reporting system.

Are you prepared to assess your organization for policies and processes concerning ethics?

This course is a good place to start. It provides a comprehensive overview of the elements of organizational ethics and the responsibilities for establishing and maintaining an ethical climate in an organization. Explore the roles of internal audit and compliance departments in supporting and assessing the ethical climate, examine approaches to auditing ethics, and determine the best approaches for reporting the results of an ethics audit.

DEVELOPING A RISK & CONTROL MATRIX FOR DISRUPTIVE TECHNOLOGIES

Hours	: 8
Knowledge Level	: Intermediate
Prerequisites	: Participants should have 2 + years experience in internal audit
Advance Preparation	: None
Participants Guide Book	: 86 pages
Charges Range in the USA	: \$ 879 - \$ 1099 per person

Course Contents:

UNIT 1: Innovation Overview; UNIT 2: Innovation Risks and Controls; UNIT 3: Auditing Innovation

Course Details:

Technology and associated cyber threats are evolving at an increasingly accelerated pace. What was once considered emerging — or even futuristic — is quickly being engrained into business processes. As a result, rapidly developing, innovative technology and tools are being added to the risk radar and internal audit programs.

In this highly interactive course, participants will investigate key considerations for auditing topics including digital transformation, multi-cloud strategy, storage minimalism and SSD data reduction, multifactor authentication with biometrics, Smart contracts, AI in cybersecurity, augmented/virtual reality, data fabric in data analytics, data/automation ethics, and more.

By engaging with the activities embedded in the course participants will walk away with a collaboratively developed Risk & Control Matrix, plus the associated user stories, to assist them in improving their audit processes related to assessing these topics.

AUDITING THE DATA PRIVACY POLICY

Hours	: 3
Knowledge Level	: Intermediate
Prerequisites	: Fundamentals of IT Auditing, or equivalent information technology experience
Advance Preparation	: None
Participants Guide Book	: 64 pages
Charges Range in the USA	: \$ 269 - \$ 369 per person

Course Contents:

UNIT 1: Establishing a Data Privacy Policy; UNIT 2: Conducting a Data Privacy Risk Assessment; UNIT 3: Auditing the Data Privacy Policy

Course Details:

When business leaders and boards are asked about their top concerns, protecting customer data is usually on top of the list. According to Gartner, by 2023, 65% of the world's population will have their personal data protected by privacy regulations. In addition, UNCTAD stated that in 2022 137 out of 194 countries have put in place data protection and privacy regulations.

The objective of a data privacy policy audit is to assess an organization's privacy protection posture against any regulatory requirements — or international best practices validating the organizations policy is supported by an effective internal control structure.

This course will provide participants with an overview of data privacy regulations, and specific considerations for designing and performing an audit of their organization's data privacy policy.

BUILDING A SUSTAINABLE QUALITY PROGRAMME

Hours	: 16
Category	: Quality Assurance & Improvement Programme
Knowledge Level	: Intermediate
Prerequisites	: Participants should have 3-5 years' Experience in internal audit
Advance Preparation	: None
Participants Guide Book	: 160 pages
Charges Range in the USA	: \$ 1429 - \$ 1919 per person

Course Contents:

UNIT 1: Quality Assurance Program Overview & The Global Internal Audit Standards; UNIT 2: Ethics and Professionalism; UNIT 3: Governing the Internal Audit Function; UNIT 4: Managing the Internal Audit Function; UNIT 5: Performing Internal Audit Services; UNIT 6: Building a Sustainable Quality Program

Course Details

Building an effective quality assurance and improvement program (QAIP) is similar to establishing a total quality management program, of which products and services are analyzed to verify they meet stakeholder expectations, operations are efficient and effective, and their practices conform to applicable standards.

Many internal audit functions have created QAIPs that demonstrate their commitment to quality and performance to Standards in the International Professional Practices Framework (IPPF).

With the establishment of the Global Internal Audit Standards, the next generation of QAIPs must be developed to conform to the new Principles and Standards. In this next generation, QAIPs include:

- Quality will be a combined measure of conformance with the Global Internal Audit Standards and the achievement of the internal audit function's performance objectives.
- QAIPs will be designed to evaluate and ensure the internal audit function conforms with the Standards, achieves performance objectives, and pursues continuous improvement.

This course provides participants with an opportunity to evaluate their current QAIP and improve its sustainability. Participants will also examine the Principles and Standards of the Global Internal Audit Standards and assess their internal audit functions' readiness to transition to the new framework.

COMMUNICATION SKILLS FOR AUDITORS: INTERVIEWING AND NEGOTIATING

CPE Hours Available	: 16
Category	: Soft Skills
NASBA Knowledge Level	: Basic
Prerequisites	: None
Advance Preparation	: None
Participants Guide Book	: 160 pages
Charges Range in the USA	: \$ 1349 - \$ 1789 per person

Course Contents:

UNIT 1: The Communication Model; Unit 2: Introduction to Interviewing and Negotiating; Unit 3: Interviewing Skills; UNIT 4: Application of Interviewing Skills; UNIT 5: Negotiating Skills; UNIT 6: Application of Negotiating Skills

Course Details:

Effective communication to senior management and the board, and to individual internal auditors from Chief Audit Executives (CAEs) is referenced throughout the International Standards for the Professional Practice of Internal Auditing. For example, IIA Standard 2420: Quality of Communications, requires that communications be clear, easily understood, and logical, and provide significant and relevant information.

Are you ready to develop and improve your communication skills for the engagement process?

This two-day course is complete with highly interactive individual and group activities, as well as role-play scenarios to provide internal auditors — at all levels — with opportunities to develop or sharpen their interviewing and negotiating skills. After completing this course, internal auditors will have a profound awareness of how to effectively interview and negotiate, and be prepared to apply these skills in their organizations.

The Communication Skills for Auditors course is:

- Designed to present information about interviewing and negotiating that will help to improve your skills.
- An opportunity to practice new skills without the pressure to “get it right.”
- A judgment-free zone, where you can interact freely with peers and receive feedback, guidance, and support to enhance your communication skills as they relate to interviewing and negotiating.

Who will benefit from this Course? This course is for internal auditors — at all levels — who have a desire to develop or sharpen their interviewing and negotiating skills.

CRITICAL THINKING: A VITAL AUDITING COMPETENCY

Hours	: 8
Category	: Soft Skills
Knowledge Level	: Basic
Prerequisites	: None
Advance Preparation	: None
Participants Guide Book	: 128 pages
Charges Range in the USA	: \$ 879 - \$ 1099 per person

Course Contents:

UNIT 1: Critical Thinking Overview; UNIT 2: Biases and Fallacies; UNIT 3: Critical Thinking while Interviewing; UNIT 4: Risk Assessments and Critical Thinking

Course Details:

Critical thinking is often the central ingredient necessary for providing insights that help management better manage risk and create a sustainable control environment. Most organizations consider critical thinking an indispensable skill for internal auditors.

Critical thinking skills lead to improved decision-making and can result in better organizational performance. It involves the tasks of collecting and analyzing information, drawing compelling conclusions, and providing recommendations that better enable organizations to achieve their strategic objectives.

This course examines the various facets and components of this important core competency and demonstrates how it can be weaved throughout key elements of the audit process. Critical thinking is disciplined thinking that is clear, rational, open-minded, and informed by evidence, which makes it ideally suited for application in an audit setting. The concepts and practices presented in this course are designed to enhance audit effectiveness and deliver measurable value to audit customers.

DEVELOPING AUDIT FINDINGS

Hours	: 8
Category	: Audit Methodology
Knowledge Level	: Basic
Prerequisites	: None
Advance Preparation	: None
Participants Guide Book	: 116 pages
Charges Range in the USA	: \$ 839 - \$ 1099 per person

Course Contents:

UNIT 1: Value of Audit Findings; UNIT 2: Overcoming Common Mistakes in Writing Audit Observations; UNIT 3: Developing Effective Audit Findings

Course Details:

A significant amount of time is committed to an internal audit engagement, and a clear and actionable audit observation is critical to communicate issues noted during the engagement. Audit observations provide management, the board, and stakeholders with adequate detail and an objective summary of an organization's operations, risks, and controls, as well as a thorough summary of the audit work performed. Audit observations are the means by which internal audit communicates audit results. But what does it take to develop an actionable audit observation, and what signifies an audit observation as actionable?

This highly interactive course provides internal auditors with timely insights into how to utilize critical-thinking techniques to translate audit findings into actionable audit observations. This course is not focused on the act of audit report writing, but rather on the foundational component of audit reporting — an effective audit observation. This course reviews the common writing mistakes that impact an internal auditor's ability to effectively communicate audit observations. During this course, participants will practice writing audit observations, as well as review audit observations for peers.

Who will benefit from this course? By participating in this course, internal auditors in all sectors and at all levels will be able to recognize what should be included in an efficient and actionable audit observation that will meet professional standards. By honing critical thinking and writing skills, internal

auditors can distinguish themselves as effective communicators and trusted advisors. Course Objectives Explore the importance of critical thinking when developing audit observations. Identify common writing mistakes and how to improve writing quality. Recognize and practice how to develop audit observations that are accurate, objective, clear, concise, constructive, complete, timely, and actionable. Develop audit observations that articulate the connection between the finding, and how it could impact the audit client's ability to meet their objectives. Conduct peer reviews of audit observations.

ESSENTIALS FOR AI AUDITING

Hours	: 8
Knowledge Level	: Intermediate
Prerequisites	: Experience in internal audit engagements
Advance Preparation	: None
Participants Guide Book	: 106 pages
Charges Range in the USA	: \$ 879 - \$ 1099 per person

Course Contents:

UNIT 1: Introduction to AI; UNIT 2: Risk Management in AI; UNIT 3: Internal Audit's Role in AI Strategy; UNIT 4: Regulatory Compliance and Standards; UNIT 5: AI Auditing Framework; UNIT 6: Controls for Mitigating AI Risks

Course Details:

In today's rapidly evolving business landscape, the integration of artificial intelligence (AI) technologies is becoming increasingly prevalent. Internal auditors play a pivotal role in ensuring the effectiveness, safety, privacy, and security of AI models within organizations. This course is designed to equip internal auditors with the knowledge and skills necessary to navigate the complexities of AI and contribute effectively to their organization's AI strategy. The course covers a wide range of topics from the fundamentals of AI technology to the specific challenges and risks associated with auditing AI systems. Participants will gain insights into AI governance, management strategies, policy development, risk management, and the role of internal audit in the context of AI.

By the end of this course, internal auditors' ability will be enhanced to contribute proactively to their organization's AI strategy, effectively assess AI-related risks, and audit the responsible and secure use of artificial intelligence within their respective organizations.

ENTERPRISE RISK MANAGEMENT: THE FOUNDATION FOR BETTER ORGANIZATION –WIDE DECISION MAKING

Hours	: 16
Category	: Enterprise Risk Management (ERM)
Knowledge Level	: Intermediate
Prerequisites	: Participants should have at least 3 years of experience in internal audit and be involved in the ERM process
Advance Preparation	: None
Participants Guide Book	: 201 pages
Charges Range in the USA	: \$ 1349 - \$ 1789 per person

Course Contents:

UNIT 1: Risk: An Overview; UNIT 2: Strategy & Objective Setting; UNIT 3: Identifying & Assessing Risks; UNIT 4: Risk Responses; UNIT 5: Information, Communication, & Reporting; UNIT 6: Governance and Culture; UNIT 7: Review and Revision

Course Details:

ERM is not a process, a tool, a department, or a list of risks – it is how an organization makes better business decisions. COSO recently updated the ERM Framework with increased emphasis on recognition that risk management is fundamental for an organization to align its actions with its strategy.

At the same time, ISO is nearly finished updating its standard 31000. With the advent of these two significant updates, it is time to reconsider the foundations of risk and risk management. Every organization is in the “risk management” business as managing risk is part of nearly everything an organization does.

This course unpacks the theory behind ERM with group activities and real-world scenarios to help you apply the concepts of risk management.

This course is designed for internal auditors with at least 3 years of experience who are involved in the ERM process, as well as managers and other professionals who deal with the complexities of ERM.

ETHICALLY MASTERING THE GLOBAL INTERNAL AUDIT STANDARDS

Hours	: 8
Knowledge Level	: Intermediate
Prerequisites	: Participants should come with knowledge of, and experience with, the auditing process under the 2017 IPPF conformance expectations
Advance Preparation	: None
Participants Guide Book	: 179 pages
Charges Range in the USA	: \$ 579 - \$ 1049 per person

Course Contents:

UNIT 1 - The IPPF Evolution 30; UNIT 2 - Domain I: Purpose of Internal Auditing and Domain II: Ethics and Professionalism; UNIT 3 - Domain III: Governing the Internal Audit Function; UNIT 4 - Domain IV: Managing the Internal Audit Function; UNIT 5 - Domain V: Performing Internal Audit Services

Course Details:

Are you an experienced user of the 2017 IPPF? Concerned about how to adapt your internal audit function's best practices and methodologies to be in conformance with the new Global Internal Audit Standards? This course is just for you!

The Ethically Mastering the New Global Internal Audit Standards course is designed specifically for internal auditors seeking to enhance their knowledge and skills in alignment with the revised International Professional Practices Framework (IPPF) and Standards set forth by The Institute of Internal Auditors (IIA). This course delves into the changes introduced to the IPPF and Standards, with a particular emphasis on the five domains that govern the internal audit profession.

This unique two-part course is comprised of a 6 hours instructor-led training session intended to walk participants through the structure, changes in language, and new requirements to keep in front of mind as they prepare to adopt the revised IPPF. The remaining 2 hours will be completed as self-study as participants apply their enhanced understanding of the Global Internal Audit Standards.

FINANCIAL AUDITING FOR INTERNAL AUDITORS

Hours	: 16
Knowledge Level	: Basic
Prerequisites	: None
Advance Preparation	: None
Participants Guide Book	: 155 pages
Charges Range in the USA	: \$ 1429 - \$ 1789 per person

Course Contents:

UNIT 1: Accounting and Auditing Review; UNIT 2: Financial Statements – An Overview; UNIT 3: Business Processes and Accounting; UNIT 4: Risks of Fraud in Accounting; UNIT 5: Technology and Accounting

Course Details:

Financial auditing is key for an organization and its earnings, as it boosts its productivity. Conducting financial internal audits on a regular basis allows the organization to identify some aspects of the business units that have to be addressed. The results of the internal audit will also determine whether the company's financial statements are accurate, complete, and compliant with the established regulations, which is critical for the organization to avoid fines if publicly traded.

The Securities and Exchange Commission of the USA filed 760 total enforcement actions in the fiscal year 2022, a 9 percent increase over the prior year, totaling 6.439 billion dollars in fines. Is your organization prepared to pay fines?

In this course, participants will learn how key business processes relate to financial statements, as well as the impact of technology on financial auditing. The course will walk participants through an analysis of an organization's financial statements using scenarios, where participants will calculate key ratios and analyse trends over time. By engaging in discussions on both historic and current fraud cases, participants will learn how to recognize key "red flags" in financial statement reporting.

FRAUD AUDITING

Hours	: 8
Knowledge Level	: Intermediate
Prerequisites	: None
Advance Preparation	: None
Participants Guide Book	: 165 pages
Charges Range in the USA	: \$ 879 - \$ 1099 per person

Course Contents:

UNIT 1: Fraud Overview; UNIT 2: Common Sources of Fraud; UNIT 3: Fraud Risk Management Frameworks; UNIT 4: Fraud Risk Management; UNIT 5: Identifying Potential Fraud Risks; UNIT 6: Fraud Risk Assessment; UNIT 7: Mitigating Fraud Risk

Course Details:

According to ACFE, “internal audit detects fraud 15% of the time, while external audit merely 4% of the time.” How can we as the internal audit profession, break away from this stigmatic statistic?

This course will provide participants with an overview of the detection, assessment, investigation, and mitigation of fraud. This course also addresses fraud risk management and the importance of a fraud risk framework in mitigating fraud at an organizational level.

During this course, areas of potential high fraud risk will be discussed and recommendations for mitigation of fraud are presented.

FUNDAMENTALS OF COMPLIANCE AUDITING

Hours	: 16
Knowledge Level	: Intermediate
Prerequisites	: Tools for the new auditor/and or previous internal audit experience
Advance Preparation	: None
Participants Guide Book	: 296 pages
Charges Range in the USA	: \$ 1349 - \$ 1789 per person

Course Contents:

UNIT 1: Compliance Overview; UNIT 2: General Regulatory Compliance Risk and Controls; UNIT 3: Data Privacy Regulations; UNIT 4: Cyber security Regulations; UNIT 5: Response to a Rapidly Shifting Global Work Environment; UNIT 6: Public Reporting: ESG, DEI, and Beyond; UNIT 7: Public Sector Regulations; UNIT 8: Sarbanes-Oxley; UNIT 9: PCI DSS; UNIT 10: HIPAA; UNIT 11: GLBA and FINRA; UNIT 12: Block chain Technology

Course Details:

In 2022 the SEC charged 16 publicly traded organizations over 1.1 billion USD in penalties after discovering widespread recordkeeping failures and other regulation compliance wrongdoings. Globally, top GDPR fines of 2022 totaled nearly 218 million Euros-across just 4 notable companies. "Finance, ultimately, depends on trust. By failing to honor their recordkeeping and books-and-records obligations, the market participants we have charged today have failed to maintain that trust," said SEC Chair Gary Gensler. Can your organization afford to be out of compliance?

Compliance auditing is typically used to evaluate whether the organization is following external regulations; however, it can also be used at a corporate level to determine whether a subsidiary company follows the wider corporation's procedures and policies. Internal auditors should exhibit high levels of proficiency and professional due care to ensure adequate testing is performed, reducing the likelihood of failing regulatory and other stakeholders' expectations.

This course provides a comprehensive overview of key compliance auditing concepts that are fundamental for all internal auditors. This course will

introduce participants to a host of common regulations - both domestic to the United States, and globally - in addition to the controls needed to maintain compliance, and how to apply each regulation within the internal audit process. This course will also explore the associated reporting requirements (including but not limited to: SOX, PCI, HIPAA, breach notification, OFAC, ESG, GDPR), including tactics to collect evidence and perform internal audit activities against the regulatory reporting guidelines.

FUNDAMENTALS OF CYBER SECURITY AUDITING

Hours	: 16
Category	: Cybersecurity
Knowledge Level	: Basic
Prerequisites	: Fundamentals of IT Auditing or Equivalent experience with auditing IT general controls
Advance Preparation	: None
Participants Guide Book	: 223 pages
Charges Range in the USA	: \$ 1429 - \$ 1789 per person

Course Contents:

UNIT 1: Overview of Cybersecurity; UNIT 2: Information Security - Governance, Risk, and Control; UNIT 3: Control Primer; UNIT 4: Directive Controls; UNIT 5: Preventive Controls; UNIT 6: Detective Controls; UNIT 7: Corrective Controls; UNIT 8: Mitigating Controls
UNIT 9: Compensating and Redundant Controls
UNIT 10: Assessing Cybersecurity in Operational Audit Programs

Course Details:

According to The IIA's On Risk 2020 Report, cybersecurity is the top risk faced by organizations. The report states, "The growing sophistication and variety of cyber-attacks continue to wreak havoc on organizations' brands and reputations, often resulting in disastrous financial impacts." With innovations, including automation, cloud, and mobile computing, not to mention customer preferences moving toward self-service from any device throughout the world, having a basic understanding of cyber security is crucial for today's operational auditor. Internal auditors are expected to be cyber savvy and able to assess whether organizations are sufficiently prepared to manage cyber threats that could cause disruption and reputational harm.

Are you up to the challenge?

This introductory course provides a comprehensive overview of key cyber security concepts that can be used to facilitate audit efforts within your organization. It examines directive, preventive, detective, corrective, and mitigating controls, and how to apply each within the audit process. Finally, commonly accepted frameworks, standards, and guidelines are presented to prepare you to assess cyber security during operational audits.

FUNDAMENTALS OF INTERNAL AUDITING

Hours	: 4
Category	: Audit
Knowledge Level	: Basic
Prerequisites	: None
Advance Preparation	: None
Participants Guide Book	: 98 pages
Charges Range in the USA	: \$ 369 - \$ 489 per person

Course Contents:

Unit 1: Internal Auditing as a Profession Unit 2: Internal Auditing Frame Work;
Unit 3: The Internal Audit Process

Course Details:

If you are new to internal auditing and looking for a solid foundation as you enter the profession, this course is the perfect first step for you to become proficient in your new role. Think of it as your roadmap to understanding the fundamental concepts and knowledge you need to succeed in the world of internal audit.

During this course, you will learn about the professional standards, frameworks, and competencies you need to become competent in the profession, as well as the various career paths available to you as an internal auditor.

This course will also provide you with an essential understanding of the importance and value of internal audit within your organization.

FUNDAMENTALS OF IT AUDITING

Hours	: 16
Category	: IT General Controls
Knowledge Level	: Basic
Prerequisites	: None
Advance Preparation	: None
Participants Guide Book	: 241 pages
Charges Range in the USA	: \$ 1359 - \$ 1919 per person

Course Contents:

UNIT 1: Overview of IT Auditing Concepts and Controls; UNIT 2: Key IT Processes and Controls; UNIT 3: IT Change Management; UNIT 4: Logical Security; UNIT 5: Availability and Corrective Recovery Process; UNIT 6: System Development Life Cycle; UNIT 7: Application Controls; UNIT 8: End-User Computing; UNIT 9: Networking Essentials; UNIT 10: Cloud Computing

Course Details:

Digital transformation has enabled increased market speed, superior customer satisfaction, reduced costs, and other benefits that contribute to the achievement of organizational objectives. Organizations have never had a greater need for reliable assurance over the technological capabilities that fueled, and continue to fuel their digital transformation.

Are you prepared to help internal audit deliver this assurance? This course is a good place to start. It provides a comprehensive overview of the fundamental concepts of IT auditing, and how to apply them on the job. Learn about IT governance and the regulatory environment, general controls, application controls, and end-user computing, and how to perform various IT audits, and more.

FUNDAMENTALS OF RISK- BASED AUDITING

Hours	: 16
Category	: Enterprise Risk Management (ERM)
Knowledge Level	: Basic
Prerequisites	: Participants should have 2 years of experience in internal audit
Advance Preparation	: None
Participants Guide Book	: 179 pages
Charges Range in the USA	: \$ 1429 - \$ 1919 per person

Course Contents:

UNIT 1: Risk-based Internal Auditing: Overview; UNIT 2: Risk and Risk Management: Principles and Concepts; UNIT 3: Risk Frameworks; UNIT 4: Risk Assessment Criteria; UNIT 5: Engagement Planning and Risk Assessment; UNIT 6: Control Evaluation; UNIT 7: Communicating Results; UNIT 8: Implementation Challenges

Course Details:

Risk-based auditing ensures that the internal audit activity is focusing its efforts on providing assurance and advisory services related to the organization's top risks. Through risk-based auditing, the internal audit activity helps executive management and the board understand whether the organization's risk management processes are sufficient and how to better achieve organizational objectives through good governance, risk management, and control. This requires internal auditors to have a working knowledge of basic concepts, frameworks, tools, and techniques related to risk and risk management.

Are you ready to develop competencies in risk-based auditing?

This introductory course is a good place to start. It starts with an overview of risk management principles, including foundational concepts such as the nature of risk, risk sources and categories, risk appetite, and risk tolerance. With an emphasis on theory, this course prepares new internal auditors to become effective participants in performing risk-based internal audits.

During this course, you will participate in interactive activities and real-life scenarios. Be prepared to walk away with best practices and key takeaways you can apply to your organization and its internal audit function. In addition, you

will learn the value this approach brings to your organization. This course is designed for internal auditor practitioners who want to learn the principles and concepts of risk and risk management, as well the tools and techniques used to perform a risk-based audit.

HIGH-IMPACT AUDIT REPORTING

Hours	: 8
Category	: Audit Methodology
Knowledge Level	: Basic
Prerequisites	: Writing Audit Observations
Advance Preparation	: None
Participants Guide Book	: 145 pages
Charges Range in the USA	: \$ 839 - \$ 1099 per person

Course Contents:

UNIT 1: The Purpose of Audit Reporting; UNIT 2: Audit Reporting Tasks; UNIT 3: Audit Reporting Structure; UNIT 4: Communicating Audit Results

Course Details:

Internal audit's perspective can provide valuable insight and have a strong impact on an organization. However, in order to provide that valuable insight, persuasive communication skills are essential for auditors at all levels. High-quality audit reporting is a key communication tool that assists management in understanding audit discoveries and results.

The High-Impact Audit Reporting course focuses on the importance of delivering clear, transparent, and objective audit reports. At the conclusion of this course, you will have gained effective communication skills and techniques that will enable you to convey critical information, and write effective and meaningful audit reports, using a variety of delivery methods. In addition, you will participate in various group activities and discussions that will reinforce key audit reporting concepts.

By participating in this course, auditors in all sectors and at all levels will learn how to effectively communicate audit observations that meet professional standards, elicit management action, and communicate crucial messages to executives and board-level readers.

INTERMEDIATE IT AUDITING

Hours	: 16
Knowledge Level	: Intermediate
Prerequisites	: None
Advance Preparation	: None
Participants Guide Book	: 384 pages
Charges Range in the USA	: \$ 1499 - \$ 1979 per person

Course Contents:

Unit 1: Network and Cybersecurity Overview; Unit 2: Applying Risk Management Techniques to Assess Technology; Unit 3: Insider Threats; Unit 4: Auditing Operational Resiliency in Technology; Unit 5: Vulnerability and Patch Management; Unit 6: Incident Management; Unit 7: Auditing Identity Access Management, Zero Trust, and Micro-Segmentation; Unit 8 Understanding the Cloud Environment; Unit 9: Auditing Mobile Computing and Connected Devices; Unit 10: Auditing Social Media and Digital Presence; Unit 11: Automation Center of Excel

Course Details:

A data breach – whether caused by external bad actors or a trusted insider- can be disastrous, precipitating complex legal obligations, costly remediation, and long-lasting reputational damage. Cyber-attacks and accidental misconfigurations are top concerns among boards, executive management, and other organizational stakeholders. Internal auditors are expected to assess an organization's defence and its ability to recover should an event occur.

This course examines various technology concepts that can be used to facilitate integrated auditing efforts within an organization, including:

- Auditing Operational Resiliency in Technology and Beyond
- Auditing the Automation Center of Excellence
- Auditing the Security Operations Center (SOC).
- Auditing Identity Access Management, Zero Trust, and Micro segmentation.
- Auditing the Cloud
- Auditing Mobile Computing and Connected Devices

- Auditing Social Media and Digital Presence

Participants of this course will examine the connection between cybersecurity and network security, obtain greater insight into the pros and cons of technology insurance, and explore how to apply the audit process to key areas, including operational resilience, identity access manage, cloud computing, , mobile computing, cloud environments, and social media. Finally, the course explores common cyber-related frameworks, standards, and guidelines, and explains how to audit common cyber-security solutions.

LEVERAGING ARTIFICIAL INTELLIGENCE IN INTERNAL AUDIT

Hours	: 8
Knowledge Level	: Intermediate
Prerequisites	: Experience in Internal Audit Engagements
Advance Preparation	: None
Participants Guide Book	: 107 pages
Charges Range in the USA	: \$ 879 - \$ 1099 per person

Course Contents:

UNIT 1: AI Tools to Streamline the Internal Audit Process; UNIT 2: Benefits of AI on Audit Processes; UNIT 3: AI Risks in the Internal Audit Process; UNIT 4: Impact of AI in Internal Audit; UNIT 5: Operational Implementation of AI Tools
UNIT 6: Change Management Framework

Course Details:

In today's rapidly evolving business landscape, internal auditors must adapt to the transformative power of Artificial Intelligence (AI) to enhance efficiency, effectiveness, and insight in their audit processes. This course is designed to equip internal auditors with the knowledge and skills necessary to leverage AI tools effectively throughout the audit lifecycle.

By the end of this course, internal auditors will have the knowledge and confidence to harness the power of AI to optimize their audit processes, reduce risk, and provide valuable insights to their organizations. Join us in this transformative journey towards more efficient and effective internal auditing through AI integration.

NAVIGATING THE GLOBAL INTERNAL AUDIT STANDARDS

Hours	: 16
Knowledge Level	: Basic
Prerequisites	: None
Advance Preparation	: None
Participants Guide Book	: 262 pages
Charges Range in the USA	: \$ 1429 - \$ 1919 per person

Course Contents:

UNIT 1: Purpose of Internal Auditing; UNIT 2: Ethics and Professionalism; UNIT 3: Governing the Internal Audit Function; UNIT 4: Managing the Internal Audit Function; UNIT 5: Performing Internal Audit Services – Planning; UNIT 6: Performing Internal Audit Services – Fieldwork; UNIT 7: Performing Internal Audit Services – Communicating; UNIT 8: Performing Internal Audit Services - Monitoring

Course Details:

Are you new to internal audit? Or a first-time user of The IIA's International Professional Practices Framework (IPPF)? This course is a comprehensive training that offers participants a unique opportunity to develop a foundational and fundamental understanding of the internal audit profession, the internal audit process, and how the IIA's International Professional Practices Framework (IPPF), including the effective 2025 Global Internal Audit Standards serves as the guiding compass for the internal audit activity.

Whether you are pursuing an understanding of the internal audit nomenclature as a new practitioner; a in depth exploration of the domains, principles, and standards because you are an external auditor transitioning to internal auditing; or even on the staff of a new internal audit department that needs to prepare for building a quality assurance improvement program, this course delivers an enhanced level of knowledge of the professional practice of internal auditing.

This highly interactive, hands-on, comprehensive course begins with an introduction to The Institute of Internal Auditors (The IIA); the widely recognized guidance found in the IPPF, including the Global Internal Audit Standards; and compares and contrasts internal audit to external audit, while also helping you

to understand the purpose, authority, and responsibility of the internal audit activity and the concept of governance. This course also provides high-level guidance on how to communicate findings, conclusions, reports, and overall opinions; disseminate results; and establish action plans and monitoring programs.

OPERATIONAL AUDITING: INFLUENCING POSITIVE CHANGE

CPE Hours Available	: 16
Category	: Audit Methodology
NASBA Knowledge Level	: Intermediate
Prerequisites	: Completion of Tools & Techniques I: New Internal Auditor Course, Fundamentals of Internal Auditing course, or basic internal audit knowledge
Advance Preparation	: None
Participants Guide Book	: 201 pages
Charges Range in the USA	: \$ 1429 - \$ 1919 per person

Course Contents:

UNIT 1: Dynamics of Operational Auditing; UNIT 2: Essential Skill Sets and Knowledge; UNIT 3: Planning for Success; UNIT 4: The Risk-Based Operational Audit; UNIT 5: The Process-Oriented Operational Audit; UNIT 6: The Performance-Driven Operational Audit; UNIT 7: Creating a Positive Impact through Reporting

Course Details:

Management focuses on initiatives and issues that impact upon the operating models of business activities and processes, such as environmental stewardship, operational excellence, supply chain optimization, offshoring, talent mobility, innovation, and cloud computing to name a few. Given these dynamics, internal audit is in a unique position to influence value enhancement efforts. This is achievable through Operational Auditing.

Participants will get to explore current and emerging business trends and issues across industry sectors. They will also discover that operational auditing plays an important role in today's business environment well beyond the realm of money, compliance, and traditional internal controls, and into the realm of a trusted business partner influencing management's pursuit of operational excellence.

They will also learn how to employ various methods, tools, and skills to collect and analyze operational information and data, identify causes of operational issues and risk exposures, and develop solutions to enhance the operational

performance of business activities, processes, and/or resources deployed across the organization.

This highly interactive and dynamic program engages participants through group sharing, focused activities, and case study based simulations.

Who will benefit from this course?

Chief audit executives, audit directors, audit managers, audit team leads, with 2+ year's practical auditing experience, and who are looking to integrate operational auditing into their service offering or enhance the value of operational auditing services provided to the organization.

Business managers responsible for ensuring effective use and management of corporate resources, who want to evaluate and improve the operational performance of business activities, processes, and / or resources deployed.

Course Objectives

- Identify how the changing business environment has influenced past trends in operational auditing.
- Examine key skill sets and knowledge essentials associated with a trusted advisor.
- Review key aspects of the project planning process that promote the successful outcome of operational audit engagements.
- Describe operations objectives and the drivers of associated risks, measures of risk events, design of operations-focused controls, and criteria to evaluate operational performance.
- Discuss the application of business process improvement methods and tools during an operational audit.
- Define the different types of benchmarking and measurement criteria and
- Explain how benchmarking methodology can be used during an operational audit.
- Discuss different reporting approaches and persuasive strategies to attain management's buy-in to results and solutions.

PERFORMING AN EFFECTIVE QUALITY ASSESSMENT

CPE Hours Available	: 16
Category	: Quality Assurance and Improvement Programme
NASBA Knowledge Level	: Intermediate
Prerequisites	: None
Advance Preparation	: None
Participants Guide Book	: 228 pages
Charges Range in the USA	: \$ 1669 - \$ 2219 per person

Course Contents:

UNIT 1: Quality Assessment Manual and Process Overview; UNIT 2: Types of Quality Assessments; UNIT 3: Planning the Quality Assessment; UNIT 4: Performing the Quality Assessment; UNIT 5: Evaluating and Reporting Quality Assessment Results

Course Details:

As an organization grows and its internal processes change and evolve, its quality monitoring process must keep pace. To ensure consistent quality in this dynamic environment, an ongoing commitment to growth and improvement is essential.

The required elements of a Quality Assurance and Improvement Program (QAIP) include periodic internal assessments and external assessments to demonstrate conformance with The IIA's International Standards for the Professional Practice of Internal Auditing. In addition, a quality QAIP can provide evidence to the audit committee and management that the internal audit activity is efficient, effective, and adding value. It can also build stakeholder confidence and document a commitment to quality, leading practices, and the internal auditors' mind set for professionalism.

This course will provide you with the appropriate knowledge and skills to plan, perform, and evaluate the results of an external quality assessment case study. You will also learn about the processes and tools in the IIA Quality Assessment

ROOT CAUSE ANALYSIS FOR ENHANCING INTERNAL AUDIT EFFECTIVENESS

CPE Hours Available	: 8
NASBA Knowledge Level	: Intermediate
Prerequisites	: Completion of Critical Thinking—A Vital Auditing Competency, or equivalent experience
Advance Preparation	: None
Participants Guide Book	: 132 pages
Charges Range in the USA	: \$ 839 - \$ 1099 per person

Course Contents:

UNIT 1: Root Cause Analysis: An Overview; UNIT 2: Root Cause Analysis in Planning; UNIT 3: Root Cause Analysis in Fieldwork; UNIT 4: Root Cause Analysis in Reporting

Course Details:

When a problem occurs in an organization, it is followed by many questions — the first of which, and probably the most important, is “why?” To answer this all-important question thoroughly and completely, internal auditors should seek to identify the problem’s origin — the root cause. A root cause analysis should be a core building block to help answer the question of “why,” and enhance an organization’s continuous improvement efforts.

This instructor-led course will explore key root cause analysis tools and techniques that can be utilized in the planning, fieldwork, and reporting phases of an internal audit engagement; and enhance audit effectiveness, strengthen audit observations, and facilitate deeper discussions with management on issues identified. These tools can be used apart from or in conjunction with existing audit methodologies, tools, and techniques. Participants will have the opportunity to practice and apply the skills learned through a case study and exercises, can be immediately integrated into future audit engagements.

TOOLS FOR AUDIT MANAGERS

CPE Hours Available	: 24
Category	: Audit Plan
NASBA Knowledge Level	: Expert
Prerequisites	: Participants should come with knowledge of, and experience with the auditing process
Advance Preparation	: None
Participants Guide Book	: 272 pages
Charges Range in the USA	: \$ 1549 - \$ 2169 per person

Course Contents:

UNIT 1: Overview of the Audit Model; UNIT 2: Overview of the Internal Control Environment; UNIT 3: Audit Governance, Roles & Responsibilities; UNIT 4: The Audit Cycle – Audit Planning; UNIT 5: The Audit Cycle – Audit Fieldwork; UNIT 6: The Audit Cycle – Audit Report & Wrap Up; UNIT 7: Quality Assurance & Improvement Program; UNIT 8: Supervising & Developing Staff; UNIT 9: Leadership Skills, UNIT 10: Managing Change; UNIT 11: Managing Relationships & Marketing Internal Auditing; UNIT 12: Innovative Problem Solving

Course Details:

This course provides new audit managers with the tools and the skills necessary to manage audit teams successfully — and does so strictly from an audit manager’s perspective. This course provides essential insight into the roles and responsibilities of audit management, and lists the key concepts needed to successfully lead and mentor staff.

This course includes interactive group activities and breakout sessions of real-life scenarios that teach the concepts, tools, and techniques needed to supervise and develop an audit team, manage change, and effectively manage relationships within the audit team, and with the CAE, executive management, and audit committee. Audit managers that complete this course will walk away with proven internal audit practices that can be immediately applied to an organization of any size and within any industry.

TOOLS FOR LEAD AUDITORS

CPE Hours Available	: 24
Category	: Audit Plan
NASBA Knowledge Level	: Intermediate
Prerequisites	: Participants should come with knowledge of, and experience with the auditing process
Advance Preparation	: None
Participants Guide Book	: 317 pages
Charges Range in the USA	: \$ 1629 - \$ 2169 per person

Course Contents:

UNIT 1: The Global Internal Audit Standards and the Audit Model; UNIT 2: Overview of the Internal Control Environment; UNIT 3: Audit Governance, Roles, and Responsibilities; UNIT 4: Staff Development and Leadership; UNIT 5: Audit Planning; UNIT 6: Test Plan and Work Program Development; UNIT 7: Reviewing Audit Evidence and Workpapers; UNIT 8: Audit Findings and Recommendations; UNIT 9: Audit Reporting and the Exit Conference; UNIT 10: Audit Wrap-up and Report Issuance; UNIT 11: Audit Follow-up; UNIT 12: Quality Assurance and Improvement Program

Course Details:

Leading an internal audit project requires knowing and fully understanding the audit process and possessing the ability to guide an engagement team in performing the fundamental responsibilities of internal auditing. This course provides an overview of the life cycle of leading an audit engagement, including planning, examining the internal control environment and organizational governance, obtaining and presenting audit evidence, wrapping-up the audit engagement, and measuring the effectiveness and efficiency of the audit engagement.

This instructor-led course includes interactive group activities and breakout sessions of real-life scenarios that teach the concepts, tools, and techniques needed for leading an internal audit team. Lead auditors that complete this course will walk away with proven internal audit practices that can be immediately applied to an organization of any size, and within any industry.

TOOLS FOR NEW AUDITORS

CPE Hours Available	: 24
Category	: Audit Plan
NASBA Knowledge Level	: Basic
Prerequisites	: None
Advance Preparation	: None
Participants Guide Book	: 286 pages
Charges Range in the USA	: \$ 1549 - \$ 2169 per person

Course Contents:

UNIT 1: The Global Internal Audit Standards ;UNIT 2: Understanding the Control Environment; UNIT 3: Governing the Internal Audit Function, Roles & Responsibilities ;UNIT 4: Engagement Planning & Opening Conference ;UNIT 5: Conducting an Interview; UNIT 6: Engagement Risk Assessment, Internal Controls, & Walkthroughs; UNIT 7: Engagement Program Development; UNIT 8: Engagement Fieldwork & Testing; UNIT 9: Engagement Findings & Recommendations ;UNIT 10: Engagement Reporting & Exit Conference; UNIT 11: Engagement Wrap-Up & Workpaper Review; UNIT 12: Quality Assurance & Improvement Program

Course Details:

Learning and understanding the fundamentals of internal auditing is a necessary step for the new internal auditor who wants to grow quickly within the profession. This seminar provides an overview of the life cycle of an audit engagement, including planning, examining the internal control environment and audit governance, obtaining and presenting audit evidence, and successfully wrapping-up the engagement.

This course includes, interactive group activities and breakout sessions of real-life scenarios that teach the essential concepts, tools, and techniques of internal auditing. Internal auditors that complete this course will walk away with solid internal audit practices that can be immediately applied to an organization of any size, and within any industry.

THIRD- PARTY RISK MANAGEMENT FOR INTERNAL AUDITORS

Hours	: 16
Knowledge Level	: Intermediate
Prerequisites	: Participants should have a foundational understanding of Internal Auditing principles and Practices. Basic knowledge of Risk management, Governance, and Organizational Behaviour will be beneficial
Advance Preparation	: None
Participants Guide Book	: 195 pages
Charges Range in the USA	: \$ 1429 - \$ 1789 per person

Course Contents:

UNIT 1: Introduction to Third-Party Risk Management; UNIT 2: Understanding of Third-Party Ecosystem and Risks; UNIT 3: Regulatory Landscape and Compliance Requirements; UNIT 4: Third-Party Risk Management Program Considerations and Leading Practices; UNIT 5: Third-Party Relationship Lifecycle and Leading Practices; UNIT 6: Auditing Third-Party Risk Management Programs; UNIT 7: Integration

Course Details:

In today's interconnected business landscape, organizations increasingly rely on third-party relationships to achieve their objectives and enhance operational efficiency. However, these relationships come with inherent risks that can impact an organization's reputation, financial stability, and compliance with regulatory requirements. Internal auditors play a crucial role in identifying, assessing, and mitigating these risks to protect their organizations.

This course is designed to equip internal auditors with the knowledge, skills, and tools necessary to effectively evaluate and manage the risks associated with third-party relationships. Through a combination of lectures, case studies, practical exercises, and discussions, participants will gain a deep understanding of the principles and leading practices in third-party risk management.
